

Recognition of Service

At the BCECA Design, Safety and Environment Committee meeting on 5 June, the BCECA CEO, Tracey Shelley, made a presentation to Adrian Bunn, the committee Chair, to recognise his 20 years of service to BCECA and the DS&E committee. Adrian has represented a number of different employers during his involvement with BCECA, including Snamprogetti, MW Kellogg, KBR, Aker Solutions and Fluor. In 1999, when Adrian attended his first DS&E committee meeting, it was held at the Royal and Overseas League in St James. BCECA meetings then moved in 2007 to the IChemE's Portland Place offices until BCECA relocated to its current premises in Camelford House in 2016.

Marketing and Communications

You may have noticed over recent months that BCECA has updated its logo and branding. A new promotional leaflet has been produced to help raise BCECA's profile and attract new members and work is currently underway to develop a new website which will include information about BCECA Members, as well as people and project profiles. If you would like to contribute towards the website content, please get in touch: admin@bceca.org.uk.

A collective voice for engineering contractors

BCECA has provided a focus for intelligence gathering and knowledge sharing for more than 50 years. Our membership includes many of the world's most widely recognised and respected engineering contractors. We lead, shape and drive discussion with decision makers in important policy areas, including skills supply, training, regulation and taxation. BCECA is a discrete and trusted network that provides knowledge, intelligence and influence for engineering contractors who do business within the global process and energy sectors.

- **BCECA leads, shapes and drives discussion**

Today's policy landscape is more complex than ever before. Brexit and potential restrictions to the free movement of goods, services and skills won't make things easier.

Talk to us about your legislation and regulation challenges
- **BCECA supports the skills pipeline**

A sustainable supply of engineering graduates and technicians is needed to secure the contracting skills base in the next decade. Competition will be keen; good people may become harder to find and more difficult to retain.

Talk to us about your skills issues
- **BCECA engages within industry**

Considered opinion and collective influence gives our member companies a stronger voice. We work to ensure that the views of engineering contractors are understood across the energy and process industries.

Talk to us about our industry wide networks

Priorities	Projects	Successes
<ul style="list-style-type: none"> BCECA has identified four policy areas of concern to members: IR35 and compliance with off-payroll working legislation The impact of Brexit and any future trade deal with the EU Immigration controls and the medium-term labour supply The future of the skills pipeline for engineering contractors 	<ul style="list-style-type: none"> Salary surveys and intelligence sharing on the state of the global order book Case studies and good practice reports in SHE performance and CSR Annual workshops in engineering departments at selected UK universities Setting training standards and developing employer focussed programmes Collaboration with ECITB to meet the training needs of off-site employers 	<ul style="list-style-type: none"> Close working with the Institute for Apprenticeships and Technical Education to develop a new Level 4 apprenticeship standard in Information Management Representation to the government's Migration Advisory Committee secured concessions to the Tier 2 visa arrangements, making it easier for member companies to bring essential skills to the UK Collaboration with Professional Engineering Institutions shapes the development of learning outcomes from undergraduate degrees and the professional formation of process and energy engineers
New input is welcomed	New members can get involved	Strengthen our collective voice
