

## BCECA Conference

The inaugural BCECA conference, “Delivering the Energy Transition: An Industry Perspective”, is taking place online on 6th October, and the agenda is rapidly taking shape. To date, we have secured guest speakers from BP, the EIC and the ECITB. Registrations for this free-to-attend event will commence in mid-July and places will be limited so keep an eye out for your invitation.

## Baby News

BCECA is very pleased to announce that Young Engineers' Committee Chair, Celine Dischamps, gave birth to a beautiful baby girl, Emily Lucy Christie on 9th June. After a few complications, mother and daughter are now both home and doing well.

Whilst Celine is on maternity leave, John Vickers of Air Products has stepped in as Chair of the Young Engineers' Committee. He and his partner have, also, just had a baby girl on 13th June, Liliana Tian-Vickers.

The Young Engineers are clearly doing their bit to increase BCECA's membership!

## INWED 2021

23rd June was International Women in Engineering Day. The Women's Engineering Society announced the winners of the Top 50 Women in Engineering Awards 2021 during the Engineering Heroes virtual event. Amongst the winners is Kelly Paul, Core Projects Team Lead – UKI at BCECA member company Air Products PLC.

Many congratulations to Kelly!
