

BCECA Conference 2022

Preparations for BCECA's second conference are now well underway. Last year's Conference Working Group, under the direction of BCECA Board Member Malcolm Crawford, has been re-formed. SevenEvents have been re-appointed to manage the event and provide the online platform to deliver the virtual conference. Cogent Communications are again working with BCECA on all marketing and communications activities for the event.

SevenEvents
Create Deliver Inspire

The Conference Working Group has outlined the agenda for "The Energy Transformation Challenge", which will examine the realities and complexities of decarbonising energy intensive activity in the UK and globally. The conference will open with a scene-setting keynote contribution from one of the UK Parliament's leading contributors on energy matters, Dr Alan Whitehead MP. It will then move on to examine a range of big picture issues, including the importance of robust supply chains and the potential impact of well-executed decarbonisation projects on the UK economy. Project financing, commercialisation, innovation, and skill supply also feature prominently on the agenda, along with a more detailed look at the experience gained and lessons learned during the execution of a range of projects spanning renewables, energy storage, transportation and decarbonisation.

BCECA Members have already been invited to submit proposals to speak and present more than half of the presentations at the conference, demonstrating their work, expertise and knowledge in the areas of:

- An International Perspective
- The Role of Innovation
- Implementation / Project Experiences.

A number of external speakers have also been identified to participate in the conference and bring their expert knowledge of energy transition to the audience.

A range of sponsorship opportunities are now available for both Member and Non-Member companies to raise their brand awareness with key industry influencers, to network and engage with decision-makers and to connect with early-career engineers and technologists. Further information on the sponsorship packages can be found [here](#) on BCECA's website.

Forthcoming Online BCECA Meetings

10th May	BCECA Board & Council	9th June	Supply Chain Managers
19th May	HR Managers	16th June	Young Engineers
24th May	DS&E	21st June	Project Controls Managers
